

It is our passion to help our pets live a long and healthy life. Diet is one of the main thing we can do as owners to help.

Processed Foods are believed to be a major cause of cancer in humans and animals.

Here is a list of some “Real Foods” for our dogs and cats. Real foods are ones that resemble as close as possible a natural diet and one that their ancestors consumed. A diet that is meat based (few carbs) and is raw.

Herbal Solutions:
